**Rapid Delivery & Installation**

### SERVICE GUARANTEE

You will not pay twice for the same work.

### NEW EQUIPMENT—SALES & SERVICE

Let us provide the right equipment for your situation, and offer 100% Satisfaction or your money back, including labor! This is our written commitment to you.

### DELIVERY & INSTALLATION

We use **Tech Data** as our primary distributor to ensure reliable ordering and on-time delivery. We do the heavy lifting, wire connections & testing.

### ONSITE LABOR

#### (WITHIN PRODUCT WARRANTY)

It's a fact of life, sometimes products fail during their supported lifetime. We offer On-site recovery labor to install replacement equipment, but at 50% standard rate.

month, **NO CONTRACT** required !

**212-666-5700**

**Emergency Service in 60 minutes !**

**We also service small business !**

## PHONE SERVICES — VOICE OVER IP

With a new VOIP phone and your existing broadband service you get unlimited calling to US & Canada, low international rates, voicemail, and cell phone simul-ring.

Vocemails can be played from Email—no need to call to get your messages!

Typing at your computer while on the phone? We have lightweight wireless headsets that make it a pleasure.

Need a wired or wireless network to connect the new phone? We will do it for you!

## WIRELESS (WIFI) NETWORK

High density living, steel frame buildings, concrete walls, and even glass cause wireless connections to weaken and drop. We survey each site and use the latest products to create stable and secure wireless networks.

## LAPTOP REPAIR

  
**SONY**  
**lenovo**  
**TOSHIBA**

*Professional Services*

## ONSITE, EMERGENCY & REMOTE SERVICES

During the initial 1 hour minimum, the technician investigates the problem, shares results, and makes a recommendation. If parts or customer decisions are required, additional time may be requested. Each service call is payable in full (including parts order) at the end of the service call.

## EMERGENCY SERVICE

Declare an emergency and any technician not already on an emergency call will arrive at your location within 60 minutes. If emergency remote support is acceptable, work starts within 30 minutes. Emergency calls are billed at emergency rate during the entire service call, including time to source emergency parts.

## REMOTE SUPPORT

Remote support shortens response times, and eliminates the inconvenience of having a visitor—very useful during non-business hours, holidays, rush hour, or inclement weather (requires Gold Plan).

## GOLD PLAN

Our pre-paid labor account offers Priority Scheduling, fewer invoices, and freedom to assign independent tasks such as Remote Support.

*Prompt, Courteous, Reliable*

## REMOTE ACCESS

Need access to your computer desktop while away from home? We have solutions that eliminate monthly costs that other services require.

## DISASTER RECOVERY

Viruses, failed hardware, & flawed software updates will turn a productive PC into a frustrating experience.

We can restore Operating System, applications, files, and desktop to a pre-failure state in a single visit.

If your PC must be replaced, we use Universal Restore to duplicate everything to a new PC—no need to buy or learn new software! (Some programs may require re-activation)

Call us **NOW** to install Disaster Recovery capability before you experience a disaster!

## INTERNET SECURITY

Our professional Firewall, Anti-Virus, Email, and Wireless solutions protect personal information, secure online purchases, and provide safe internet access for children.

## OFFSITE BACKUP

Have you promised to backup your files, but never got around to it? Let your computer always remember to send files to a secure offsite location that only you can access.
